

SIGNATURE CD PLAYER

Yves-Bernard André personally auditions every Signature CD player for many hours during production, guaranteeing that the sonic signature is exactly as he wants.

Each product is delivered with a certificate personally signed by him attesting to its performance. His signature also appears inside the machine.

Although simple in appearance, the Signature CD player weighs 30kg, making it one of the heaviest players in its class. It is designed with great thought and is made from machined aluminium. While it switches on from the rear panel, in the centre of the embossed YBA logo is a thermosensitive standby switch which responds to the touch of a finger.

The two selector switches are on the left hand side with the first handling the playback functions (play, pause and stop) and the second handles forward, backwards and skip track.

The rear panel includes two pairs of analogue outputs, an asymmetrical pair on RCA plugs and a symmetrical pair on XLR sockets. A single digital coaxial output is also provided.

YBA uses a totally symmetrical design in the Signature CD player with only active components in the signal path. No passive components are used.

SPECIFICATIONS

System	High end Philips CD-PRO m with patented Blue Diode® design
Audio Outputs	1 RCA, 1 XLR, 1 Digital (coaxial)
Unbalanced output level	2.3 V
Balanced output level	4.6 V
SNR (RCA)	115 dB
SNR (XLR)	120 dB
Frequency response	20Hz - 20kHz (-0.5 dB)
THD+N (20Hz - 20kHz)	0.0015%
Drive compatibility	CD CD-R CD-RW
Power Supply	Linear power supply with high performance UI-Core transformer 190VA
Standby Power Consumption	<0.5W
Capacitors	94,000uF analog power capacitors
Dimensions (w x d x h)	430 mm x 370 mm x 151 mm
Weight	30.5 Kg
