

# YBA

## PRODUCT INFORMATION

### SIGNATURE MONO POWER AMPLIFIER

**Yves-Bernard André personally auditions every Signature CD player for many hours during production, guaranteeing that the sonic signature is exactly as he wants.**

**Each product is delivered with a certificate personally signed by him attesting to its performance. His signature also appears inside the machine.**

The choice of materials is an important part of the design of YBA amplifiers. The chassis of the Signature is made from a block of aluminum milled in the mass. Besides absolute rigidity, it also allows different internal boundaries free from electro-magnetic interference. This mechanical structure allows mounting on 2 levels of components that are fixed on either side of the central portion! The transistors are mounted on a solid aluminium block with special mica wafers, which improves heat dissipation to avoid thermal distortions.

All of the materials used to manufacture for YBA electronics are non-magnetic. The selections and tests of the French manufactured components, are more precise to avoid any unbalanced effect and increase reliability. YBA Signature transistors are specially selected in order to be perfectly matched.

The mono amplifier is a derivative of the stereo power amplifier.

### SPECIFICATIONS

Audio Outputs	1 speaker output (can be single wired or bi-wired)
Power Output	Mono 200W @ 8Ω per channel Mono 400W @ 4Ω per channel
SNR	>95dB
Frequency Response	20Hz - 20kHz (-0.5dB)
THD+N (20Hz - 20kHz)	<0.1%
Inputs	1 RCA 1 Balanced
Power Supply	Linear power supply with high performance UI-CORE Transformer 1000VA
Standby Power Consumption	<0.5W
Dimensions (w x d x h)	430mm x 390mm x 170mm
Weight	42.5 kg
