Eddict Player App – Using Wireless Projection with YBA R100

iOS version at Apple App Store:

https://apps.apple.com/us/app/eddict-player/id1529232239

Android version at Google Play Store:

https://play.google.com/store/apps/details?id=com.shanling.eddictplayer

Applicable for firmware V1.52

How to set-up Wireless Projection

1. Connect both devices to the same Wi-Fi network
2. On R100, go to "Network Service" and enable the "Wireless projection".
3. On your phone, open Eddict Player app. In main menu, swipe right to view additional features. Click on "Wireless projection".
4. App will scan for your R100. Click on the R100 to get them connected.
   If no device shows up, click on the refresh icon in top right corner.
   Note: When connecting for the first time, R100 will show warning window and you need to confirm connection.
5. Once both devices are linked, your phone will exactly mirror your R100, giving you access to all menus, settings, playback options, etc.
6. To turn off Wireless projection on your phone, click on the exit icon in top right corner of screen.
