

YBA Design YT302 System Update Procedure

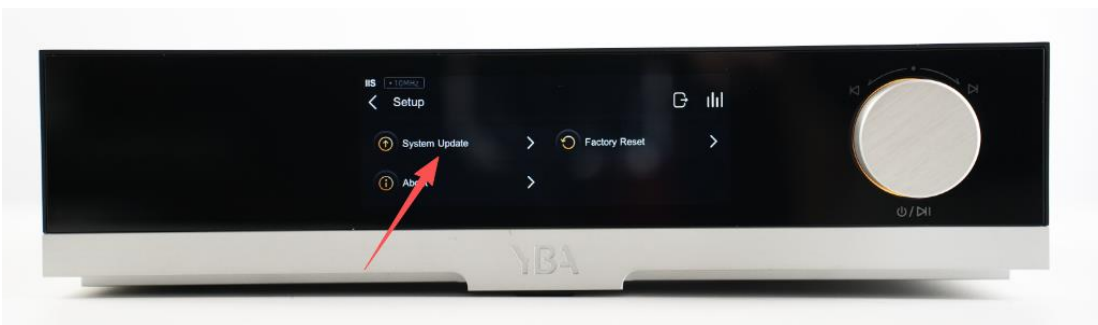

1. Copy the provided “Update.bin” file to a USB Drive. Copy it into the Main/Root Level, not into any sub-folder.
2. Insert the USB drive into the rear USB-A port (labelled “USB AUDIO”).

3. Enter the “Setup” menu and then scroll to the bottom.

4. Select “System Update” and press on “Enter” to start the update process.

5. Wait for the device to automatically update the firmware. Please do not interact or turn off the device during update process.
Once completed, the system will restart automatically. Then you can resume normally using the device.
